PROFESSIONAL SUMMARY

Senior Frontend Developer with 3+ years of experience building web and mobile products with Next.js, React, TypeScript and React Native. Skilled in frontend architecture, API integration and product analytics, and works AI-first with Claude Code to plan, build and ship features faster. Experienced in collaborating with Product, BI and backend teams in Agile delivery.

WORK EXPERIENCE

Senior Frontend Developer **Aug 2026 - Present**
Summit Trade & Resources

- Lead frontend development of a consumer web platform for the Vietnam market with Next.js, React and TypeScript.
- Build responsive, fast interfaces with a focus on a polished user experience.
- Work AI-first with Claude Code to plan, build, review and ship features faster.

Software Engineer **Feb 2025 - Aug 2026**
SNSoft Sdn Bhd

- Built and maintained SaaS web and mobile features with React, TypeScript and React Native.
- Built event tracking with XHR pipelines and PostHog, defining event schemas with the BI team.
- Delivered new screens and API integrations, scoping requirements with Product Managers.
- Built an internal pull request notifier that improved team visibility and cut manual follow-ups.
- Resolved production issues, improved stability and took part in peer code reviews.

Web Developer SEO **Aug 2024 - Jan 2025**
C&Y Information Technology

- Developed and managed SEO-focused WordPress websites across multiple business domains.
- Conducted keyword research using SEMrush and implemented on-page SEO optimizations using Yoast SEO.
- Improved technical SEO, SSL configurations, indexing performance, and website visibility.
- Managed scalable website duplication and optimization workflows for content deployment.
- Maintained website performance, responsiveness, and search engine compliance.

Web Developer / Software Engineer **Nov 2023 - Aug 2024**
Three Logic Concepts @ 3LC

- Developed and maintained responsive web applications using ReactJS, TailwindCSS, and related frontend technologies.
- Implemented cross-browser compatible and mobile-responsive UI components.
- Collaborated with QA developers to resolve bugs and improve application quality.
- Participated in code reviews and frontend optimization initiatives.

Internship as Software Engineer **Oct 2022 - Jan 2023**
Brunsfield Computer System Sdn Bhd

- Developed 5 full-stack web applications following the Software Development Life Cycle (SDLC).
- Built web application modules using HTML, CSS, JavaScript, AJAX, JSON, and MySQL.
- Assisted in frontend and backend feature implementation and debugging processes.

EDUCATION & CERTIFICATIONS

Bachelor of Science (Hons) Software Engineering with Merit **May 2020 - Jun 2023**
Universiti Tunku Abdul Rahman (UTAR) · CGPA 3.26

SOFTWARE PROJECTS

Baiki – Workshop Management SaaS (Own Product)

- Built a mobile-first workshop management SaaS for Malaysian car and motorcycle workshops.
- Covers customers, vehicles, service history, parts stock, and invoices with PDF export.
- Includes a live job board, WhatsApp service reminders and English, BM and Chinese support.
- Technologies: React, TypeScript, Supabase, Tailwind CSS, shadcn/ui

Landing Page Builder (Own Product)

- Built a no-code builder for client landing pages with templates, section and theme editing.
- Live preview on desktop, tablet and mobile, then publish each page to its own link.
- Contact forms save each lead and open a WhatsApp chat with the business.
- Technologies: Next.js, TypeScript, Tailwind CSS, shadcn/ui, Postgres, Auth.js

Pocketbook – Money Tracker PWA (Own Product)

- Built an installable money tracker for income and expenses that works fully offline.
- Shows a safe-to-spend amount with a 50/30/20 plan and charts spending by day and category.
- Keeps data on the device, with CSV export and backup.
- Technologies: Next.js, TypeScript, Tailwind CSS, Dexie, Recharts

Followback – Instagram Follower Checker (Own Product)

- Built a multi-page site and PWA that shows who doesn't follow you back on Instagram.
- Reads the Meta data export entirely in the browser, so there is no login and no upload.
- Pro subscription with license keys via Lemon Squeezy, plus a follower history chart.
- Technologies: JavaScript, HTML, CSS, PWA, Lemon Squeezy

SKILLS

- Frontend: React, Next.js, TypeScript, React Native, JavaScript, Tailwind CSS, shadcn/ui, HTML, CSS
- Backend & Database: Node.js, Supabase, PostgreSQL, Prisma, Firebase, MySQL
- Analytics & SEO: PostHog, event tracking, technical SEO, SEMrush, Yoast SEO
- Tools & Platforms: Git, Claude Code, Vercel, WordPress, Stripe, Clerk, Payload CMS

ADDITIONAL INFORMATION

- Freelance: built a full-stack Multi Level Marketing travel system for a client with React, TypeScript, PostgreSQL and Prisma.
- Code at github.com/Jevonzz and live demos at jevonzz.github.io.
